PROJECTS

Lat-mile Delivery Analytics Platform – CO₂ emission (Python, MySQL, Power BI) | [Live Dashboard](#) | [GitHub](#)

- Engineered an end-to-end last-mile delivery analytics platform for a fictional Dutch logistics company, analysing 24,923 shipments across 5 cities using Python, MySQL, and Power BI. Identified €146M in annual recoverable value through three data-driven recommendations targeting operational cost reduction and EU carbon compliance.

Business Insights 360 – (MySQL, Power BI) | [GitHub](#) | [Live Dashboard](#)

- Designed and deployed an end-to-end Power BI business intelligence platform (MySQL data warehouse, star schema, 50+ DAX measures) delivering five executive dashboards across \$4.97B in global revenue, uncovering a \$522M operational expense gap and a 45.67% gross-margin premium channel opportunity.

SQL Business Intelligence – Ad Hoc Insights (MySQL, Power BI) | [GitHub](#) | [Presentation](#)

- Consolidated fragmented sales data across channels to build an executive KPI reporting pack; proactively flagged underperforming categories, ~29–31% discounting risk, and a retailer-heavy channel mix (73%) — each with recommended corrective actions and tracking KPIs

Sales & Finance Analytics Suite (Excel, Power Pivot, Power Query) | [GitHub](#) | [Presentation](#)

- Built a unified sales and finance reporting system that cut manual reporting time by 83% (12 hrs → 2 hrs/month) and mitigated \$180K+ annual margin leakage through an automated discount governance tool with structured approval tiers. Designed full ETL pipeline and Star Schema model, managed end-to-end project lifecycle (BRD, RACI, UAT).
