SUMMARY

Data Analyst with 5+ years across retail, FMCG, supply chain, and manufacturing. I combine these hands-on experience with end-to-end analytics (dbt, Power BI, Python, SQL). My portfolio spans OEE analysis, demand forecasting, margin diagnostics, business insight-360 and last-mile logistics. MBA in Data Analytics. Authorised to work in the Netherlands.

SKILLS

- Product analytics: Customer Behaviour Analysis, Retention & Cohort Analysis, KPI Development, Automated Reporting, Data Storytelling
- Reporting & BI: Power BI (DAX, Data Modelling, Power Query), Advanced Excel (Power Query, Power Pivot, PivotTables, Data Validation), Tableau
- Data & Programming: MySQL (Joins, CTEs, Window Functions), Python (Pandas, Matplotlib, Seaborn), Databricks, AWS
- Business Domain: FMCG, E-commerce, Subscription Analytics, Demand Forecasting, Stakeholder Management
- Soft skills: Stakeholder management, cross-functional collaboration and structured communication
- Languages: English (Fluent), Dutch (Conversable)

EXPERIENCE

Bever B.V. | Sales Analyst & Buiten Expert | Utrecht & Amsterdam, NL Sep 2023 - Present

- Analysed daily customer behaviour and sales performance data. Identifying friction points in the customer journey that drove conversion from 6% to 15% and revenue growth from €1.7M to €2.6M per store. Built and automated weekly KPI reporting tools consolidating fragmented multi-source data, enabling the team to spend less time updating trackers and more time acting on insights; earning a performance bonus for exceeding targets.

AtliQ Technologies | Data Analyst | Remote Dec 2025 - March 2026

- Automated data cleaning, validation, and QC reporting Power BI and Power Query, reducing manual data preparation time and improving analytical throughput. Analysed sales channel performance across 5 cities for Shield Insurance, identifying trend and pattern gaps that drove a 15% improvement in reporting accuracy and strengthened client engagement strategy.

Patel Delivers | Freelance | Data Analyst | kvk – 800XXX11 | Utrecht, NL Aug 2020 - Present

- KvK-registered data analytics consultancy delivering end-to-end solutions across Consumer Electronics FMCG, Supply Chain, and Retail.

Techno Electromech Pvt. Ltd. | Production Analyst, Vadodara, India Jul 2015 - Dec 2019

- Scaled OEM LED production from 300 to 2,000+ units/month per customer by building an Excel-based production planning model aligned to confirmed sales orders. Coordinated cross-functional stakeholders (Quality, Design, Warehouse, Logistics) and presented graphical performance reports in daily standups, contributing to 3.3x revenue growth (₹12 Cr → ₹40 Cr+) and net profitability improvement from 7% to 16%.
- Traced recurring delays across Store, QC, Packaging, and Dispatch; introduced a structured daily/weekly communication plan that eliminated last-minute dependency failures and reduced order-to-dispatch lead time by 2 days.

PROJECTS

Last Mile Delivery Analytics | [Live Dashboard](#) | [GitHub](#) | [YouTube](#)

- Developed end-to-end last-mile delivery analytics across 24,923 shipments in 5 Dutch cities. Built a Python ETL pipeline into MySQL, wrote SQL-based performance queries, and designed a Power BI dashboard benchmarking delivery KPIs and CO2 emissions per route. Enabled cross-city performance comparison and sustainability reporting for operational and environmental decision-making.

LumenOps 360: Manufacturing Operations Intelligence | [Live Dashboard](#) | [GitHub](#) | [YouTube](#)

- Engineered end-to-end operations analytics for a Dutch OEM LED manufacturer (Signify-like), (3 lines, 2 shifts, 18 months of data). Built 27 dbt models with 61 tests on DuckDB, developed a 6-page Power BI dashboard, and conducted SPC control chart analysis and hypothesis testing (scipy/statsmodels). Identified €798K/year improvement opportunity; changeover reduction alone recovered 8.56 OEE percentage points.

Project Hoogland: Commercial Performance Diagnostic | [Live Dashboard](#) | [GitHub](#) | [YouTube](#)

- Built a commercial performance diagnostic for a 55-store Dutch outdoor retailer (Fictional) with a B2C e-commerce channel. Designed a dbt + DuckDB transformation layer, performed Python-based margin decomposition and store-level profitability analysis, and delivered a Power BI dashboard identifying €53.6M addressable margin uplift across product categories, regions, and underperforming locations.

DemandIQ NL: Predictive Supply Chain Analytics | [Live Dashboard](#) | [GitHub](#) | [YouTube](#)

- Developed an XGBoost-based demand forecasting model for Dutch FMCG supply chain, adapting M5 Walmart competition data to regional context. Built end-to-end pipeline from PostgreSQL data warehouse through Python feature engineering and ML model training to Power BI forecast dashboards. Enabled data-driven inventory planning to reduce stockout risk and overstock waste.

EDUCATION

Wittenborg University of Applied Sciences

MBA - Data Analytics | GPA: 8.0/10 | Amsterdam, Netherlands

MS - Marketing | GPA: 7.0/10 | Apeldoorn, Netherlands

Dr. Bhimrao Ambedkar University

B.tech - Electronics and Telecommunication Engineer | Agra, India

Sep 2024 - Mar 2026

Jan 2021 - May 2023

Dec-2011 - May-2015
